SUMMARY

Backend engineer who builds web platforms and REST APIs with Node.js, NestJS and TypeScript on PostgreSQL and MongoDB, deploys them to production, and manages them too: launch planning, operating policies, team coordination and reporting to management. Experience spans e-commerce, online courses and internal business tools, with JWT/RBAC security, Redis caching, BullMQ job queues and automated testing; most recently **albasheksy.network**, a live bilingual store and courses platform.

TECHNICAL SKILLS

Backend: Node.js, NestJS, Express.js, TypeScript, JavaScript (ES6+), REST API design, WebSockets, Clean Code, SOLID
Databases: PostgreSQL, MongoDB, Prisma, Mongoose, Redis (caching), BullMQ (job queues)
Security: JWT, RBAC (CASL), bcrypt, Helmet, rate limiting, input validation; studying OWASP Top 10
Testing & DevOps: Vitest, Supertest, Postman, k6, JMeter, Docker, Git/GitHub, Linux (Ubuntu VPS), Nginx, PM2, Let's Encrypt
Frontend (working knowledge): Next.js, React, Tailwind CSS, HTML/CSS

EXPERIENCE

Syr-o — e-commerce marketplace — 10/2026 – Present
Backend Developer & Launch Coordinator — Syria

- Built an internal attendance system now used by staff in place of paper sign-in sheets (NestJS, MongoDB, JWT, role-based access); server-side timestamps and a unique per-day index block forged or duplicate records. GitHub
- Covered it with unit and end-to-end tests (Vitest, Supertest) and documented the API (Postman, AR/EN READMEs).
- Wrote the platform's pre-launch guidelines and operating policies; manage the overall launch plan.

Al-Bashek International Company — medical & dental supplies — 07/2026 – 08/2026 · launched 11/2026
Freelance Backend Developer — Hama, Syria

- Built the NestJS backend and Next.js front end of a bilingual (Arabic/English, RTL) store, paid-courses platform and admin dashboard, now live in production. Live site
- Designed 21 modules and 13 PostgreSQL models (Prisma) with JWT auth, role guards, email verification and rate limiting.
- Added Redis caching with explicit invalidation and BullMQ queues (email, images, cleanup) with retries and backoff.
- Built a provider-based payment layer (Sham Cash QR, cash on delivery, Stripe-ready) and atomic course-seat reservation.
- Deployed it on a Hostinger Ubuntu VPS: Nginx reverse proxy, PM2, Let's Encrypt SSL, firewall and nightly backups.
- Shipped post-launch features (discounts, multi-image uploads, exchange rates) backed by integration and browser tests.

Silver Store — e-commerce platform — 12/2025 – 10/2026
Backend Engineer & Team Lead — Hama, Syria

- Built backend features and REST APIs for the company's web platform and its two mobile apps (customer and vendor).
- Agreed API contracts with the mobile developer, shipped versioned releases (v1.0–v1.4), resolved production issues and wrote the handover documentation.
- Coordinated day-to-day platform operations with a 6-person team (mobile developer, data entry, photography, App Store publishing) and reported to management.

PROJECTS

Pro Portfolio Service (NestJS, Prisma, PostgreSQL, CASL) — portfolio-management backend built on a shared core library, with CASL permissions, caching and centralized exception handling. GitHub

Maison Hub (Express.js, MongoDB) — real-estate listings platform with map-based search, OTP authentication, admin approval of listings, image processing and scheduled jobs. GitHub

ARAM Real Estate Website (Next.js, React, TypeScript, Tailwind CSS) — bilingual (AR/EN, RTL) site for a real-estate developer with an interactive 2D/3D floor-plan explorer and PDF brochure viewer; Lighthouse 100 accessibility and SEO. GitHub

Task Manager API (Express.js, MongoDB, Redis, Docker) — modular API with Redis caching, background jobs and Docker. GitHub

EDUCATION

Bachelor of Informatics Engineering — Arab Private University for Science and Technology (AUST), Hama — 2021 – 2026

CERTIFICATIONS

Google AI — Google, via Coursera · 2026 Verify
AWS Cloud Solutions Architect Professional Certificate — Amazon Web Services, via Coursera · in progress
